Inform. Educate. Inspire.

**Tanisha Taylor**  
Director of Sustainability

A person wearing a black t-shirt with a Superman logo and a pink bicycle is riding on a paved road. To the left, a dark SUV is parked. In the background, another person is riding a bicycle, and there are orange traffic cones and a yellow diamond-shaped sign on the road. The scene is outdoors with trees and a hillside in the background.

# **Beyond the Details: Considering the Benefits of Active Transportation**

**ALWAYS WEAR A HELMET**  
A proper fitting helmet should set right above eyebrows and be tightly buckled so it doesn't slip when riding

**OBEDIENCE TRAFFIC SIGNS**  
Always ride with the traffic, obeying traffic signs and using proper hand signals

**NEVER WEAR HEADPHONES**  
When riding your bike, turn off the music and do not wear headphones so you can devote your full attention to the road

**NIGHT RIDING**  
Try not to ride at night or in bad weather, but if you must, remember to have lights and proper reflectors on your bicycle and reflectors on your clothing

**CLOTHING CAUTION**  
Watch out for loose pant legs or shoe strings that can get stuck in bike chains

# Why Measure The Benefits?

# Why Measure The Benefits?

***“2/3 of merchants said new bike lanes had a positive overall impact on their business.”***

# How Do You Get Info?

Physical Activity

Air Pollution

Traffic Injuries

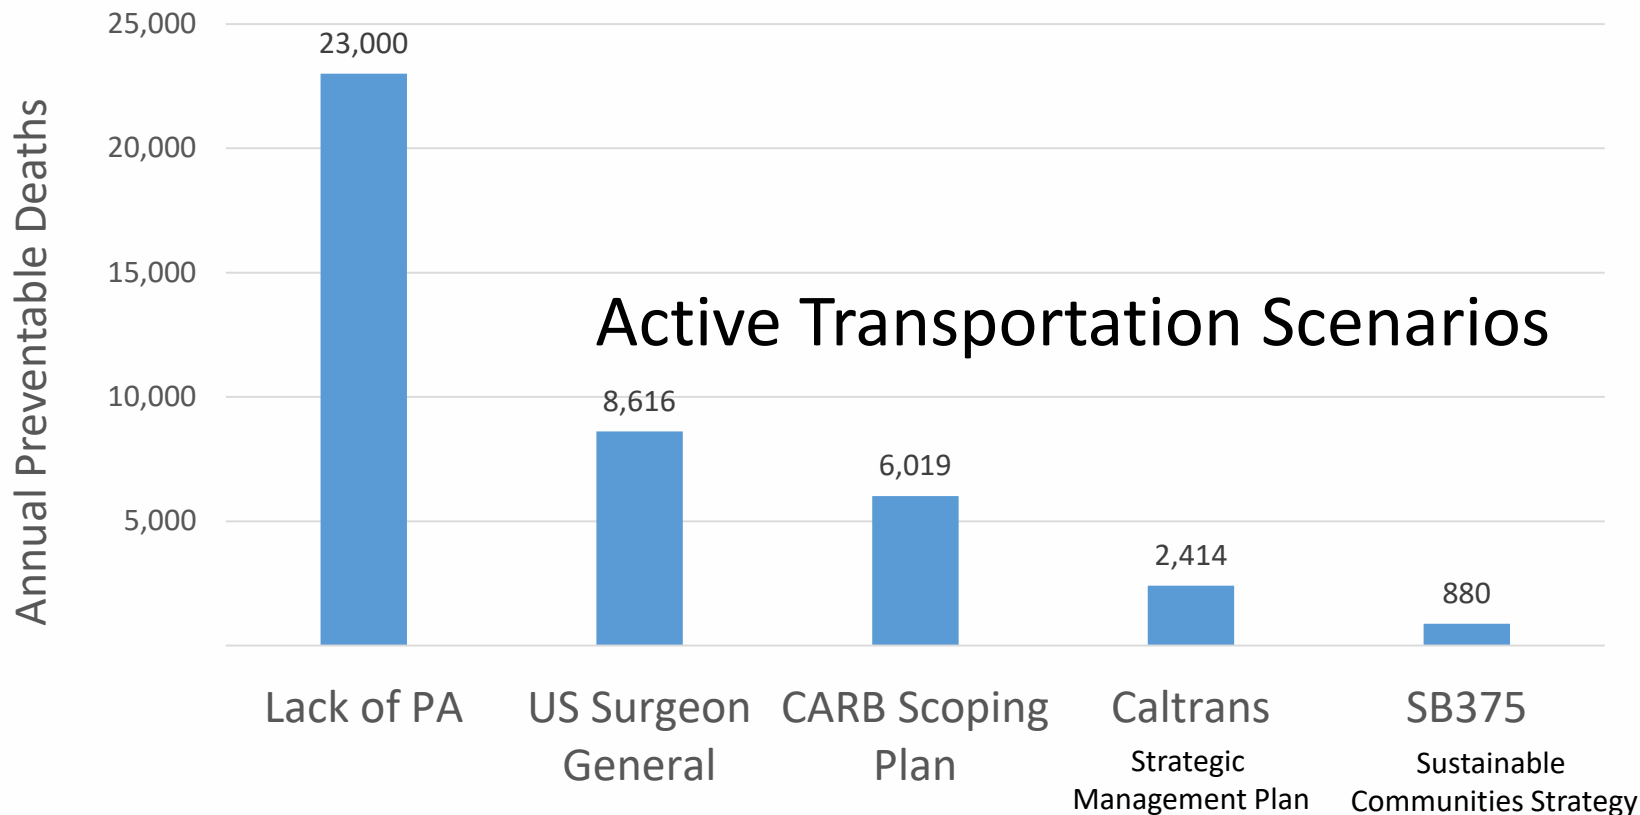

Health Outcomes

1. Premature Deaths
2. Disability Adjusted Life Years
  - ✓ Years Living with Disability
  - ✓ Years of Life Lost
3. Costs

# Health Co-Benefits of Physical Activity by Substituting Walking and Cycling for Short Car Trips

Preventable Chronic Disease Deaths and California's Transportation Plans/Goals

# Annual Change in Car Carbon Emissions in California's Transportation Plans and Goals

# Pro/Cons of Tools

- ITHIM Use cases
  - Policy Education (PA, Air pollution, Traffic Safety)
  - Health Impacts of transportation plans/MPOs
  - State agency goals for greenhouse gas reduction
  - Equity Analysis
- ITHIM limitations: not sensitive to small geographic scale
  - Depends on other models to predict changes in travel patterns due to policy, systems, or environmental changes
- HEAT (Health Economic Assessment Tool):  
<https://www.heatwalkingcycling.org/#homepage>
  - Good for project level analyses:
  - If  $x$  people regularly walk or cycle an amount of  $y$ , what is the economic value of the health benefits that occur as a result of the reduction in mortality due to their physical activity?

# Conclusions from ITHIM Publications

- California State agency plans and goals fall along a wide range of health benefits from active travel physical activity.
- Monetized annual value range: \$1 billion to \$67 billion
- SCS plans are the most modest on a spectrum of ambition
- While net health benefit is positive, pedestrian and bicyclist injuries increase in many plans – safety alert!
- Physical activity benefits far exceed those from air pollution reduction
- Plans/goals that emphasize cycling achieve both high health benefits and carbon reductions

# Sample Report

## Parent Survey About Walking and Biking to School

**Dear Parent or Caregiver,**  
Your child's school wants to learn your thoughts about children walking and biking to school. This survey will take about 5 - 10 minutes to complete. We ask that each family complete only one survey per school year for their child. If more than one child from a school brings a survey home, please fill out the survey for the child with the next birthday from today's date.

After you have completed this survey, send it back to the school with your child or give it to the teacher. Your responses will be kept confidential and neither your name nor your child's name will be associated with any results.

Thank you for participating in this survey!

**+ CAPITAL LETTERS ONLY – BLUE OR BLACK INK ONLY +**

School Name: \_\_\_\_\_

Grade: (PK,K,1,2,3,...) \_\_\_\_\_

Monday's Date (Week count was conducted) \_\_\_\_\_

Number of Students Enrolled in Class: \_\_\_\_\_

1. What is the grade of the child who brought home this survey?  Grade (PK,K,1,2,3,...)

2. Is the child who brought home this survey male or female?  Male  Female

3. How many children do you have in Kindergarten through 8<sup>th</sup> grade? \_\_\_\_\_

4. What is the street intersection nearest your home? (Provide the names of two intersecting streets)

\_\_\_\_\_ and \_\_\_\_\_

Place a clear 'X' inside box. If you make a mistake, fill the entire box, and then mark the correct box.

5. How far does your child live from school?

Less than 1/4 mile  1/4 mile up to 1/2 mile  More than 1/2 mile

1/2 mile up to 1 mile  1 mile up to 2 miles  Don't know

Place a clear 'X' inside box. If you make a mistake, fill the entire box, and then mark the correct box.

6. On most days, how does your child arrive and leave for school? (Select one choice per column, mark box with X)

**Arrive at school** **Leave from school**

0 2 M H D D Y Y Y Y 1 5

Please conduct these counts on two of the following three days Tuesday, Wednesday, or Thursday. (Three days would provide better data if counted)

Please do not conduct these counts on Mondays or Fridays.

Before asking your students to raise their hands, please read through all possible answer choices so they will know their choices. Each Student may only answer once.

Ask your students as a group the question "How did you arrive at school today?"

Then, reread each answer choice and record the number of students that raised their hands for each. Place just one character or number in each box.

Follow the same procedure for the question "How do you plan to leave for home after school?"

You can conduct the counts once per day but during the count please ask students both the school arrival and departure questions.

Please conduct this count regardless of weather conditions (i.e., ask these questions on rainy days, too).

**Step 1.** Fill in the weather conditions and number of students in each class

**Step 2.** AM – "How did you arrive at school today?" Record the number of hands for each answer.

PM – "How do you plan to leave for home after school?" Record the number of hands for each answer.

**Key**

S = sunny R = rainy O = overcast SN = snow

## Evaluation

### Identifying issues, improving activities and understanding results

Around the country, communities are conducting Safe Routes to School (SRTS) programs in order to enable and encourage children to walk and bicycle safely to school. Communities tailor a combination of engineering, education, encouragement and enforcement strategies to address the specific needs of their schools. **Evaluation** is an important component of any SRTS program. Evaluation is used to determine if the aims of the strategies are being met and to assure that resources are directed toward efforts that show the greatest likelihood of success. Also, evaluation can identify needed adjustments to the program while it is underway. This information describes how to conduct a SRTS program evaluation that is tailored to that program's objectives and strategies.

# PARENT SURVEY RETURN RATES SANTA CRUZ COUNTY

# Student Travel Mode Implementation Recommendations

- Having teaching staff conduct surveys is time/cost effective
- Collecting 2 days of data on one day saves time and makes the task less onerous for teachers
- Ensure weather in two data collection points is similar
- Consider selecting a sampling of the classrooms (one or two grades perhaps)
- Remember mode surveys are children's self-reported behavior and can be influenced by classroom peers
- Sometimes parent survey and student mode survey results differ, we defer to parent surveys in that case

# Bike Smart

## Youth Bicycle Safety Education Program

A Safe Routes to School Program of Ecology Action

### Rodeo Evaluation

Your feedback is very important to us to ensure our program continues to meet the needs of our participants and their teachers. Thank you for completely filling out this form and returning it to program staff.

Teacher Name: Ms Steele School: Oak Avenue  
Email: asteel@granfield.k12.ca.us Grade: 5th  
Rodeo Date: 5/31/19 # of Students: 25

#### 1. Based on student responses & your observation, please rate the following:

	Agree					Disagree				
1. Youth learned important bicycle safety skills.	5	4	3	2	1					
2. Students Improved their bicycle safety skills.	5	4	3	2	1					
3. Youth enjoyed the activities.	5	4	3	2	1					
4. Staff and volunteers were knowledgeable and effective.	5	4	3	2	1					

#### 2. Will the Bike Smart training increase safe bicycling behaviors for your students?

Yes  No

Comments: Absolutely! It's always important to be aware of how to be safe, especially on a bike.

#### 3. What impact did the Bike Smart Program have on the youth and school?

I think it was a positive impact and they learned bike safety skills.

# Walk Smart

## Youth Pedestrian Safety Education Program

A Safe Routes to School Program of Ecology Action  
www.ecoactbike.org

### Walk Around the Block or School Site Training Teacher Evaluation

Your feedback is very important to us to ensure our program continues to meet the needs of our participants and their teachers. Thank you for completely filling out this form and returning it to program staff.

Teacher Name: Miss Mocttin School: La Gloria  
Email: Rmocttin@gonzales.k12.ca.us Grade: 2  
Field Trip Date: 5/17/2019 # of Students: 22

#### 1. Based on student responses & your observation, please rate the following:

	Agree					Disagree				
1. Youth learned important pedestrian safety skills.	5	4	3	2	1					
2. Students Improved their pedestrian safety skills.	5	4	3	2	1					
3. Youth enjoyed the activities.	5	4	3	2	1					
4. Staff and volunteers were knowledgeable and effective.	5	4	3	2	1					

#### 2. Will the Walk Smart training increase safe walking behaviors for your students?

Yes  No

Comments: Many youth have never had instruction in this important safety area. Thank you.

#### 3. In what ways do you think the Walk Smart program will make an impact on student, family, and school transportation behavior?

Hopefully, these students will be the examples for friends + family. With continuous (year to year) instruction, more communities will be more cautious.
